Peer Review Declaration

This is to confirm that all publications of Med-e-Tel: The International Educational and Networking Forum for eHealth, Telemedicine and Health ICT (http://www.medetel.eu) are peer reviewed.

We declare that the paper:

- **First Experience in Implementing an Open Source Health Information System for a City Hospital in a Developing Country**
  J. Quesada

has been peer reviewed by experienced researchers in the field of Telemedicine/ eHealth who were independent of the research and the researchers.

Because of the short amount of time between paper submission, acceptance decisions and the beginning of the publication process, Med-e-Tel 2016 is not able to allow a two-way discourse between the authors and the reviewers of a paper.

As the paper received two positive reviews it will be included for publication in the:

- Global Telemedicine and eHealth Updates: Knowledge Resources, Vol. 9, Eds. Jordanova M., Lievens F., Publ. ISfTeH, Printed in G. D. of Luxembourg, ISSN 1998-5509, 2016

- Electronic Proceedings of The International eHealth, Telemedicine and Health ICT Forum for Educational, Networking and Business (Med-e-Tel 2016), Eds. Jordanova M., Lievens F., Publ. ISfTeH, Printed in G. D. of Luxembourg, ISSN 1818 - 9334, 2016.

if at least one of the co-authors will register and pay the speaker registration fee by end February 2016.

Yours sincerely,

Malina Jordanova, MD, PhD
Educational Program Coordinator
